Whole Home Brochures

Thank you for downloading your UltraWater Solutions brochures! Below are a few important notes before you print:

Print-Ready Files Each brochure is an **8.5 x 11" tri-fold design**, professionally formatted for commercial printing. Each brochure file includes printer's marks (crop marks and bleeds), which are standard in professional printing:

- Crop marks show where the brochure should be trimmed after printing.
- Bleeds ensure that the design extends all the way to the edge, with no white borders.

Any professional printer will recognize and work with these formats.

Customize Your Contact Info Each brochure includes a form field on the back page where you can enter your personal contact details under the "Contact Your Local Dealer" section. Just open the file in Adobe Acrobat or any PDF editor to add your information.

Printing Options You're welcome to use any printer you prefer. Dealers have successfully printed through:

- [UPrinting.com](https://uprinting.com)
- [Canva.com](https://canva.com)

We're also happy to pass along our cost at a trusted local Reno printer. If you'd like us to handle printing, just email help@ultrawatersolutions.com with your order.

Dealer pays shipping – here's the pricing:

- 50 brochures – \$65
- 100 brochures – \$115
- 250 brochures – \$190
- 500 brochures – \$330
- 1,000 brochures – \$490

Important Note on Quantities Brochures must be ordered in batches by design — they cannot be mixed and matched. For example, if you want 50 of two different brochures, you would need to order 50 of each design, not a mix of both in one batch.
